## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 13, 6, 14-17, and 10-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Sekine (US 2003/ 0,043,462). As to claim 13, Sekine discloses diffractive surface (25b or 26b) with alignment mark therein (25a or 26a) producing phase difference of length corresponding to integer multiple of light wavelength (para. 15; cl.10). Further as to claim 6, note para. 46-47. Further as to claim 14, note that with the disclosed alignment mark (25a or 26a) at an integral wavelength multiple, inherently there is at least a second wavelength which does not have an integral multiple pathlength. Further as to claims 15-17, note Figs. 3-4. Further as to claims 12 and 10-11, note Figs. 1-4 and para. 42-46.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2877

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-5 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sekine.

As applied to claim 13 above, Sekine discloses applicant's invention except without expressly disclosing, as to claim 7, a metal ring holding the substrate. However, Figs. 2-3 and para. 42, 45 disclose a barrel 21 holding the substrate, and it would have been notoriously well-known and obvious to one of ordinary skill to make the barrel (i.e. holding ring) of metal, for motivation of durability of construction.

As applied to claims 14 and 13 above, Sekine discloses applicant's invention except without expressly disclosing, as to claims 4 and 5, a second wavelength. However, it is notoriously well-known in the art to use a use a second, typically longer and/or lower power wavelength for e.g. pre-alignment of which Official Notice is taken, for motivation of avoiding photosensitive damage prior to main photolithographic etching.

As to claims 8-9, Sekine discloses alignment mark at center as applied to claim 15 above and it would have been obvious to one of ordinary skill in the art to use a metal ring for motivation as applied to claim 7 above; further obvious to pre-align, for motivation as applied to claims 4-5 above.

### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this

Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
